## SUMMARY

Full-Stack .NET Developer specializing in **ASP.NET Core, C#, and Angular**. Computer Science graduate and ITI Full-Stack .NET graduate with freelance experience building production systems and end-to-end applications. Experienced in **Clean Architecture, CQRS, REST APIs, SQL Server, and AI integration using RAG and LLMs**. Seeking a Junior Backend or Full-Stack .NET role.

## EXPERIENCE

**Freelance Full-Stack Developer – Center Management System** 2026

- Delivered a production system for a paying client to manage students, groups, instructors, attendance, and payments.
- Implemented financial tracking and reporting features for revenue management.
- Owned the project end-to-end, including requirements, architecture, development, and client communication.

**Freelance Software Developer – Clinic Management System** 2026

- Developed a WPF and C# desktop application to manage clinic operations and daily workflows.
- Integrated a scanner device to digitize and manage patient documents.

## EDUCATION

**Information Technology Institute (ITI) — 9-Month Professional Diploma** 2025 – 2026

- Professional Development & Power BI Infused CRM, Menoufia Branch

**Faculty of Science, Menoufia University** 2021 – 2025

- Bachelor of Computer Science and Mathematics
- Grade: Very Good

## PROJECTS

**LegalFlow – AI-Powered Legal Case Management System** [GitHub](#)

*ASP.NET Core, Angular, SQL Server, AI Agent, RAG, OCR*

- Built a platform for managing legal cases, clients, documents, and workflows.
- Developed an AI Agent using OCR, LLMs, and RAG to analyze legal documents and extract structured information.
- Implemented RAG over Egyptian legal references for context-aware legal document drafting.

**Gym Management System** [GitHub](#)

*ASP.NET Core, Angular, SQL Server, SignalR, OpenAI*

- Built a system for members, subscriptions, attendance, coaches, and workout plans.
- Applied Clean Architecture, CQRS, JWT Authentication, and Entity Framework Core.
- Added real-time communication using SignalR and an OpenAI-powered fitness assistant.

**E-Commerce Web Application** [GitHub](#)

*ASP.NET Core MVC, SQL Server, Stripe*

- Built an e-commerce platform covering products, cart, orders, and checkout.
- Integrated Stripe for online payments and implemented an admin dashboard.
- Used ASP.NET Identity and Google OAuth for authentication and authorization.

## TECHNICAL SKILLS

**Languages:** C#, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

**Backend:** ASP.NET Core Web API, ASP.NET MVC, REST APIs, SignalR

**Frontend:** Angular, Tailwind CSS, Bootstrap

**Databases & Data Access:** SQL Server, Entity Framework Core, Dapper, LINQ, Query Optimization

**Software Engineering:** Clean Architecture, CQRS, SOLID, Design Patterns, REST API Design

**AI / LLM:** RAG Systems, LLM Integration, OpenAI API, Gemini API, ChromaDB, Vector Search

**Testing & Tools:** Unit Testing, Swagger/OpenAPI, Postman, Docker, Git, GitHub, CI/CD, Visual Studio, Hangfire

## LANGUAGES

**Arabic:** Native    **English:** Fluent
